

PIBSA-1300

• Product Introduction

PIBSA-1300 is polyisobutylene succinic anhydride that prepared by high-activity polyisobutylene (Mn =1300) and maleic anhydride, can be used for the preparation of fine performance ashless dispersant, can also be used to produce other additives.

• Product Technical Index

Item	Index	Typical Value (Range)
Appearance	Viscous Transparent Liquid	Viscous Transparent Liquid
Kinematic Viscosity (100°C), mm ² /s	Actual Measurement	600-1000
Saponification Value, mgKOH/g	≤80	80-90
Free Acid Value, m%	≥1	0.6

• Package, Storage and Transportation

The product is packed with iron drums, net weight of 170Kg per, and suitable for all kinds of transportation modes.

The temperature of storage and transportation shall not over 75 °C ; The highest temperature for long-term storage shall not over 45 °C, 24 months product warranty, and stored in a dry, clean and ventilated warehouse.

In case of contact with skin accidentally, wash it off thoroughly with water and detergents.
